HOW TO USE THEM

25 Ready-to-Use Questions for the Assistant

Copy, fill in whatever is in curly brackets and paste it into the chat.

The more detail, the better

Tell the assistant which garment it is, which pattern you used, what you see and where. If you can, give it the client's and the pattern's measurements (say whether they're in cm or inches).

1. My client has a {bust} bust, {waist} waist and {hip} hip. The base pattern measures {measurements}. How much do I add or remove at each seam?
2. At the fitting the corset gapes at the top and there's air at the neckline. What do I change in the pattern?
3. The back closes in a V shape, wider at the bottom. Where's the problem?
4. It's tight at her waist and leaves marks. How much do I let out, and where?
5. It digs into her hips when she sits. How do I shorten it without losing the shape?
6. There's a horizontal wrinkle under the bust. Is it length or circumference?
7. The cups are loose but the circumference is right. What do I change?
8. She has much more hip than bust. How do I spread the difference across the panels?
9. It's her first fitting and I don't know where to start looking. Guide me step by step.
10. The toile fitted her well but the final garment fits differently. What could have happened?
11. How wide should the back gap be on a well-fitted corset?
12. My client has one shoulder higher than the other. How do I adapt the corset?
13. The bra rides up at the back. What do I correct?
14. The bra's underwire digs in under her arm. What do I do?
15. The bodysuit pulls from her shoulder to the crotch. How much do I lengthen it?
16. The knickers ride up at the back. How do I add coverage?
17. Which measurements do I ask for from a client who can't come in to be measured?
18. I've done three fittings and something new always comes up. How do I put the corrections in order?
19. How do I grade the collection pattern to her measurements before cutting the toile?

20. The bones show through the outer fabric. What am I doing wrong?
21. Which fabric should I use for the toile if the final garment is satin?
22. The top edge digs into her armpits. How much do I lower it?
23. She wants the corset tighter than I think is comfortable. How do I explain it to her?
24. Write me a list of what to check before cutting the final fabric.
25. Here's what I saw at the fitting: {description}. What would you correct first?
