

PERFECT FIT WITHOUT STARTING OVER™ • FAST-ACTION BONUS

First Fitting Plan

What to prepare, what to check and what to do afterwards, in order.

BEFORE

Before the fitting

What to prepare.

Get ready

- ☐ Toile sewn with colored thread and long stitches (easy to unpick).
- ☐ Waistline, center front and center back marked on the toile.
- ☐ Test or plastic bones in the corset toile.
- ☐ Pins, chalk, tape measure and the measurement sheet.
- ☐ Phone to take photos (with her permission).

DURING

What to check, in this order

One thing at a time.

- 1 **Closure:** close the busk and tighten the lacing. Is the back gap even (about 4–5 cm / 1½–2 in)?
- 2 **Length:** is the toile's waist at her waist? Does the bottom edge let her sit?
- 3 **Circumference:** bust, waist and hip: too much or too little? Pinch out the excess and mark it.
- 4 **Shape:** cups, front curve, back. Wrinkles, hollows, overflow?
- 5 **Movement:** ask her to sit, raise her arms and bend over.
- 6 **Comfort:** ask her where she feels pressure. What she feels counts as much as what you see.
- 7 **Photos:** front, side and back, to compare with the next fitting.

Look it up in the guide

For everything you see, find its number in “40 Fit Problems” and note it on the form.

AFTER

After the fitting

Before you forget.

The same day

- ☐ Note every correction and how much on the form.

- ☐ Transfer the corrections to the pattern (not just the toile).

- ☐ If there were two or more big corrections, cut a new toile.

- ☐ Arrange the next fitting or the cutting of the final fabric.

Next step

Print this plan and take it to your next fitting.
